Projects

Deconstruct Clone Website Link

Technologies: *React.js, JavaScript (ES6), Tailwind CSS, HTML5, Git, GitHub, Vercel*

- Developed a responsive clone of the Deconstruct skincare website using React.js and Tailwind CSS.
- Built reusable, modular React components and managed state with **useState** and **useContext**.
- Designed a mobile-first UI that works across mobile, tablet, and desktop screens.
- Managed version control with Git and GitHub, and deployed the project on Vercel.

Personal Portfolio Website Link

Technologies: *React.js, JavaScript (ES6), CSS3, Git, GitHub, Vercel*

- Designed and developed a responsive personal portfolio website using React.js to showcase skills, projects, and contact details.
- Built reusable React components for sections such as About, Skills, Projects, and Contact.
- Implemented a mobile-first layout with smooth navigation and a clean, user-friendly interface.
- Managed version control with Git and GitHub, and deployed the site on Vercel.
